

Managed Online Backup: Complete Protection for your Data

What if the worst happened and your data was destroyed or lost?

Sales records, accounts information, email, documents, research projects...all gone. The damage to any business would be catastrophic, especially if the local backup was destroyed too.

Ponticello has the answer – Managed Online Backup

Our Managed Online Backup solution provides a powerful, reliable and secure offsite backup for businesses. We offer complete cover for business-critical data so, if fire or theft makes it impossible to access a local backup, copies stored securely in UK-based datacentres can be recovered.

Imagine the comfort of knowing all your files are safely backed up in secure datacentres. Imagine you receive an email each day to prove it.

Our clients don't have to imagine!

Business Benefits

- **Comprehensive:** Critical data such as Sage, QuickBooks, Email and SQL as well as files and folders are all backed up and stored in secure UK based datacentres.
- **Instantaneous Backup:** A Local SpeedVault holds an on-site copy (at no extra cost).
- **Safe and Secure:** All backups are encrypted at source using Advanced Encryption Standard (AES) technology.
- **Complete Reassurance:** SystemEyes includes backup status in daily monitoring reports.
- **Flexible:** You decide what data to backup and we keep it safe for you. Change the backup plan whenever you need to.
- **28 day changed data retention:** Previous backups are retained for 28 days so you can restore your most recent data or any older version.
- **Affordable, Flexible Cover:** Pay monthly for what you use. No minimum commitment period.

How it works

Managed Online Backup is very simple: tell us which data you need to protect and we will manage the entire process for you. We will schedule backups to run at the best time to suit your business, including outside business hours. Managed Online Backup is extremely efficient and will use little or no bandwidth during working hours.

You can continue to do business with the added assurance that critical data is backed up to secure UK datacentres. Furthermore, SystemEyes will monitor the process and backup status will be included in your daily monitoring report.

What about Databases and email?

Managed Online Backup technology searches for changes at disk block level where, on average, only 0.1 - 0.5% of the protected data set will have changed. SQL Databases, Microsoft Exchange and email PST files can all be backed up.

If a large PST file is included in a backup set, only changes to the file need to be copied. This is a real example: Source 13.6GB, 41,544 Files. Backup of 132 changed files including 4 PST files, total backup size 3.6MB. Total backup time: 310 seconds.

How much?

The value of our Managed Online Backup service is immeasurable and the cost is incredibly competitive. Get complete protection for your data for just £1.50* per Gigabyte of storage per month. Minimum spend is just £10 per month and there is no minimum time commitment.

* Excludes VAT.

Why choose Ponticello?

Ponticello's Managed Online Backup service is reliable, cost-effective, secure and robust, which is why scores of local businesses choose us to help protect their most important data.

With years of practical experience, our Microsoft-qualified engineers have the skills and knowledge to help your systems perform at their very best. We always explain things clearly to help you make informed choices – and we never recommend work that you don't really need.

Don't just take our word for it...

“

I need a copy of our most important data to be stored offsite and I need confirmation each day. Ponticello's Managed Online Backup does the job perfectly. It takes a couple of seconds to check my daily report to confirm all the backups. Managed Online Backup works extremely well, I know exactly where I stand and it's about 50% less than I was paying before. Highly Recommended.

Matt Bonfield. Managing Director, Hilton Supplies, Moretonhampstead
